INDEX

A

Abstracts of papers presented at the Marine Biological Laboratory, 378.
Acartia, predicting development rate of eggs of, 457.
Acidity tolerance of oyster and clam embryos and larvae, 427.
Actinomycin D, role of in development of sea urchin embryos, 388 (abstract).
Activity, lysosomal, in clam mantle epithelium, 76.
Adaptations to temperature by Euglena, 83.
Adipose tissue thermogenesis during arousal of bats from hibernation, 94.
Aggregation size in Dictyostelium, effect of light on, 446.
Aging and motility of Arbacia sperm, 251.
  Musca, wing beat frequency and duration in, 479.
Alanine, uptake of by Ophiactis, 172.
Alcohol, effects of on sperm motility and respiration, 166.
Alkalinity, effect of on development of oyster and clam embryos and larvae, 427.
Alga, development of in closed aquarium system, 487.
Amino acid incorporation into embryonic cell-free Arbacia preparations, 391 (abstract).
Amino acids, influence of on uptake and incorporation of valine, glutamic acid, and arginine in sea urchin eggs, 204.
  uptake of by Ophiactis, 172.
Annual Report of the Marine Biological Laboratory, 1.
Anomalies in x-irradiated mouse embryos, 145.
Amphibian gastrulae, role of NaCl in sequential induction in, 415.
Annelid, oocyte development and nucleoside incorporation in, 516.
Apley, M. L. See W. R. Hunter, 392 (abstract).
Aquarium system, closed, use of in vitro culture of sea weeds, 487.
Aquatic invertebrates, uptake of organic material by, 172.
Arbacia sperm, aging and motility of, 251.
  effects of glycerol on motility and respiration of, 166.
Arenicola, mechanism of burrowing in, 369.
Arginine, influence of amino acids on uptake and incorporation of, in sea urchin eggs, 204.
  uptake of by Ophiactis, 172.
Artificial culture of sea weeds, 487.
Argyrome of new species of Euplotes, 437.
Arnold, J. M. Squid lens development in compounds that affect microtubules, 383 (abstract).
Arousal of bats from hibernation, brown adipose tissue thermogenesis during, 94.
Artemia, genetics of, 230.
  reproductive capacity of after successive P-32 doses, 261.
Assay of starfish shedding substance, 104.
Asterias, mechanism of spawning reaction in, 104.
Asterina, mechanism of spawning reaction in, 104.
Auclair, W., and B. W. Siegel. Cilia regeneration in the sea urchin embryo, 379 (abstract).
Austin, C. R. See D. G. Whittingham, 412 (abstract).
Autoradiography of Pectinaria oocytes, 516.
Axial polarity in regenerating planarians, determination of, 323.
Axon resting potential of lobster, effects of some inhibitors on, 382 (abstract).
Axons of squid, effects of divalent cations on, 411 (abstract).

B

Bal, A., P. L. Krupa and G. H. Cousineau. Ribonucleic acid in membranes of developing cells, 384 (abstract).
Bal, A. K. See G. H. Cousineau, 388 (abstract).
  P. L. Krupa, 395 (abstract).
Ball, E. G. See J. S. Hayward, 94.
Bancroft, F. C., R. C. Terwilliger and K. E. van Holde. Investigations of the subunit structure of Limulus hemocyanin, 384 (abstract).
Barclay, N. E. See H. Sato, 405 (abstract).
Barnett, G. R. See A. J. D. de Lorenzo, 380 (abstract).

Barth, L. G. The role of sodium chloride in sequential induction of the presumptive epidermis of Rana gastrulae, 415.
Bats, brown tissue thermogenesis during arousal of, from hibernation, 94.
Beers, C. D. Distribution of Urceolaria on the spines of the sea urchin Strongylocentrotus, 219.
Behavior during feeding of Pisaster, 127.
and settling mechanism of Hydractinia planulae, 410 (abstract).
Behavioral inhibition in Tubularia, 394 (abstract).
sequences in feeding response of Hydra, 403 (abstract).
Bell, A. L. The fine structure of the eye of the scallop, Pecten, 385 (abstract).
Bennett, M. V. L. See G. D. Pappas, 381 (abstract).
Bevelander, G., and H. Nakahara. Correlation of lysosomal activity and ingestion by the mantle epithelium, 76.
Bhatnagar, P. L. See M. Rockstein, 479.
Bioluminescence, endogenous diurnal rhythm of, in dinoflagellates, 115.
Bipolar head formation in regenerating planarians, 323.
Birefringence of squid giant axon, effects of temperature on, 390 (abstract).
Bladder, urinary, of crab, functions of, 272.
Blood cells, mechanical forces as cause of cellular damage in freezing and thawing of, 197.
changes in x-irradiated mouse embryos, 145.
ionic concentrations of crab, 272.
Botryllus, inland culture of, and use of in genetic experiments, 398 (abstract).
Bovine prolactin, effects of on salt fluxes in fresh-water-adapted Fundulus, 362.
Bowen, S. T., J. Hanson, P. Dowling and M.-C. Poon. The genetics of Artemia. VI, 230.
Brandt, P. W. See P. B. Dunham, 389 (abstract).
A. Selverston, 407 (abstract).
Branham, J. M. Motility and aging of Arbacia sperm, 251.
Breeding experiments with Artemia, 230.
Brine shrimp, effect of P-32 on reproduction of, 261.
mutations in, 230.
Brittle star, uptake of amino acids by, 172.
Bromide fluxes in hypophysectomized Fundulus, 362.
Brown shrimp, effect of temperature on postlarval growth of, 186.
Bruner-Lorand, J. See L. Lorand, 397 (abstract).
Bryan, J. See H. Sato, 405 (abstract).
Burrowing of Arenicola, mechanism of, 369.

C

Caffeine, effects of on response of dogfish melanophores to MSH, 470.
Calabrese, A., and H. C. Davis. The pH tolerance of embryos and larvae of Mercenaria and Crassostrea, 427.
Calanus eggs, predicting rate of development of, 457.
Capen, R. L. See W. J. Gross, 272.
Capture-recapture study of Polinices population, 292.
Carbon dioxide, effect of on motility of Arbacia sperm, 251.
Cardioactive compounds from Mercenaria heart, 393 (abstract).
Carolan, M. H., H. Sato and S. Inoué. Further observations on the thermodynamics of the living mitotic spindle, 385 (abstract).
Cassidy, J. D. Ultrastructural relationships between the developing oocyte and auxiliary cells in adult Artemia, 385 (abstract).
See Sr. M. R. Schmeer, 405 (abstract).
Cataract formation in x-irradiated mouse embryos, 145.
Cather, J. N. Induction of the shell gland by transplanted polar lobes in Ilyanassa, 386 (abstract).
Cell mass of Euglena grown at different temperatures, 83.
Cellular damage in freezing and thawing, 197.
Ceratium, endogenous diurnal rhythm of bioluminescence in, 115.
Chandler, A. See R. Rugh, 145.
Chemotaxis in slime molds, effects of light on, 446.
Chick embryos, diurnal patterns of metabolic activity in, 308.
Chloramphenicol-treatment of regenerating planarians, 323.
Chlorophyll-bodies in new species of Euplotes, 437.
Chromatophore response in Loligo, 410 (abstract).
Cilia, regeneration of in sea urchin embryos, 379 (abstract).
Ciliate, distribution of on sea urchin spines, 219.
hymenostome, destruction of Tubularia gonophores by, 391 (abstract).
new species of, 437.
Cistenides (Pectinaria) oocytes, development and nucleoside incorporation of, 516.

Claff, C. L., A. A. Crescenzi and A. P. Richmond. Respiration studies with the shark, 386 (abstract).
Clam embryos and larvae, pH tolerance of, 427.
Clark, J. I. See R. E. Stephens, 409 (abstract).
Cleavage inhibition in Arbacia caused by estradiol, cytological study of, 412 (abstract).
Clement, A. C. Cleavage and differentiation of the vegetal half of the Ilyanassa egg after removal of most of the yolk by centrifugal force, 387 (abstract).
Clotting of blood, role of transglutaminase in, 397 (abstract).
Coelomic fluid, occurrence of starfish spawning substance in, 104.
pressure, role of in burrowing of Arenicola, 369.
Collagen, development of in Fundulus, 399 (abstract).
from cuticle of marine worms, 390 (abstract).
Collagens of echinoderms, 396 (abstract).
Collins, S. E. See T. M. Thabes, 411 (abstract).
C. R. Wyttenbach, 412 (abstract).
Color changes in Palaemonetes, contribution of abdominal nerve cord to, 388 (abstract).
Colton, J. B., Jr. See T. J. M. Schopf, 406 (abstract).
Congo eel blood cells, mechanical forces as cause of cellular damage in, after freezing and thawing, 197.
Contamination with P-32, effects of on reproduction of Artemia, 261.
Control of pigment in dogfish, 470.
Cook, J. R. Adaptations to temperature in two closely related strains of Euglena, 83.
Cooper, W. R. See R. Rugh, 145.
Copeland, D. E. Electron microscopy of the gas-secreting gland of Physalia, 387 (abstract).
Copepod eggs, predicting development rate of, 457.
Corneal changes in x-irradiated mouse embryos, 145.
epithelial cells of dogfish, protein synthesis in, 413 (abstract).
Correlation of lysosomal activity and ingestion by clam mantle epithelium, 76.
Cortical protein from sea urchin eggs, 382 (abstract).
Couch, E. F., M. Fingerman and E. W. Stool. The contribution of the abdominal nerve cord to the chromatic physiology of the prawn, Palaemonetes, 388 (abstract).
Couch, E. F. See M. Fingerman, 390 (abstract).
Cousineau, G. H., P. L. Krupa and A. K. Bal. The challenge of Actinomycin D on early development in sea urchin embryos, 388 (abstract).
Cousineau, G. H. See A. K. Bal, 384 (abstract).
P. L. Krupa, 395 (abstract).
Crab urinary bladder, functions of, 272.
Crassostrea embryos and larvae, pH tolerance of, 427.
Crescenzi, A. A. See C. L. Claff, 386 (abstract).
Crossvein of Drosophila wing, effects of temperature on, 331, 346.
Crustacean, effect of temperature on growth of, 186.
genetics of, 230.
reproduction, effects of P-32 on, 261.
urinary bladder, functions of, 272.
Culture of sea weeds in recirculating aquarium system, 487.
Cummins, J. T. See J. A. Strand, 487.
Cycles of reproduction in Pisaster, 127.
Cyclic metabolic variations in chick embryos, 308.
Cytology of new species of Euplotes, 437.
Cytoplasmic accumulation of uridine in Pectinaria oocytes, 516.

D

DMAC, DMF and DMSO, effects of on sperm motility and respiration, 166.
DNA synthesis, role of in determining polarity in regenerating planarians, 323.
in dogfish peripheral blood, in vitro, 401 (abstract).
in Pectinaria oocytes, 516.
Damage in freezing and thawing, mechanical forces as factor in, 197.
Darkening of dogfish skin in vitro, in response to MSH, 470.
Darkness, effect of on aggregation size in slime mold, 446.
role of in development of Ulva in closed aquarium system, 487.
in endogenous diurnal rhythm of bioluminescence in dinoflagellates, 115.
Davis, H. C. See A. Calabrese, 427.
Density of Polinices population, 292.
of population as factor in aggregation of slime mold, 446.
Description of new species of Euplotes, 437.
of Notocotylus, 501.

DeSha, D. L. See J. A. Miller, Jr., 398 (abstract).
Determination of axial polarity in regenerating planarians, 323.
Developing chick embryos, patterns of metabolism in, 308.
oysters and clams, pH tolerance of, 427.
Rana, role of NaCl in sequential induction in, 415.
Development of Fundulus, effect of low temperature on, 379 (abstract).
of Ilyanassa shell gland after transplantation of polar lobes, 386 (abstract).
vegetal halves after removal of yolk, 387 (abstract).
of oocytes in Pectinaria, 516.
rate of copepod eggs, prediction of, 457.
of Ulva in vitro, 487.
Dictyostelium, effect of light on aggregation size in, 446.
Differences in pH tolerance of oyster and clam larvae, 427.
Differentiation in explanted Rana gastrulae tissues treated with NaCl, 415.
of Ulva in closed aquarium system, 487.
Digenetic trematode parasite of eider ducks, morphology of, 501.
Diller, W. F., and D. Kounaris. Description of a zoochlorella-bearing form of Euplotes, 437.
Dilution, role of in motility and aging of Arbacia sperm, 251.
Dinoflagellates, endogenous diurnal rhythm of bioluminescence in, 115.
Directin, chemical and biological studies on, 381 (abstracts).
Dispersal in population of Polinices, 292.
Distribution of oyster and clam larvae, role of pH in, 427.
of spawning substance in starfish, 104.
of Urceolaria on sea urchin spines, 219.
Diurnal patterns of metabolic variations in chick embryos, 308.
rhythm of bioluminescence in dinoflagellates, 115.
tidal migration rhythm of diatom, 400 (abstract).
Division rate of Euglena at different temperatures, 83.
Dogfish skin melanophores, response of to MSH, 470.
Dopamine, effects of on Mercenaria heart, 408 (abstract).
Dowling, P. See S. T. Bowen, 230.
Drosophila, effects of temperature on, 331, 346.
Ducks, trematode parasite of, 501.
Dugesia, regenerating, role of DNA in determination of axial polarity in, 323.
Duhamel, I. See R. Rugh, 145.
Dunham, J. E., G. W. Harrington and G. G. Holz, Jr. Phytoplankton sources of the eicosapentaenoic and docosahexaenoic fatty acids characteristic of marine Metazoa, 389 (abstract).
Dunham, P. B., J. P. Reuben and P. W. Brandt. Ionic fluxes in crayfish muscle fibers before and after swelling of the TTS, 389 (abstract).
Duration of wing beat in aging Musca, 479.

E

Echinoderm, distribution of Urceolaria on spines of, 219.
feeding behavior and reproductive cycles in, 127.
mechanism of spawning in, 104.
uptake of amino acids by, 177.
eggs, uptake and incorporation of amino acids by, 204.
sperm, effects of glycerol on motility and respiration of, 166.
motility and aging of, 251.
Ecology of Pisaster, 127.
of Polinices, 292.
Eel blood cells, mechanical forces as cause of cellular damage in freezing and thawing of, 197.
Effect of hypophysectomy on sodium metabolism of Fundulus gill and kidney, 155.
of temperature on growth of postlarval Penaeus, 186.
Effects of glycerol on sperm motility, 166.
of hypophysectomy and bovine prolactin on salt fluxes in Fundulus, 362.
of temperature on Drosophila, 331, 346.
Eggs, copepod, predicting development of, 457.
sea urchin, uptake and incorporation of amino acids by, 204.
Eider ducks, trematode parasite of, 501.
Elasmobranch, response of melanophores of to MSH in vitro, 470.
Electron microscopy of clam mantle epithelium, 76.
Embryos, chick, diurnal patterns of metabolism in, 308.
Crassostrea and Mercenaria, pH tolerance of, 427.
mouse, x-irradiation of, in utero, 145.
Rana, role of NaCl in sequential induction in, 415.
Endocrine responses of dogfish skin in vitro, 470.
Endogenous diurnal rhythm of bioluminescence in dinoflagellates, 115.
Epidermis of Rana gastrulae, role of NaCl in induction of, 415.

Epifaunation of sea urchin spines, 219.
Epithelium of clam mantle, correlation of lysosomal activity and ingestion in, 76.
Eptesicus, brown tissue thermogenesis during arousal of from hibernation, 94.
Estimates of population density for Polinices, 292.
Ethylene glycol, effects of on sperm respiration and motility, 166.
Euglena, strain differences in temperature adaptation in, 83.
Euplotes, description of new species of, 437.
Euryhaline fish, salt fluxes in, 362.
Evans, D. H. See W. T. W. Potts, 362.
Extraction of organisms from sand samples, new method for, 413 (abstract).
Eye, human, new method for determination of quantum efficiency of, 402 (abstract).
anomalies in x-irradiated mouse embryos, 145.
color mutations in Artemia, 230.

F

Factors affecting response of dogfish melanophores to MSH, 470.
Fatty acids in phytoplankton, 389 (abstract).
Fecundity of Artemia treated with successive doses of P-32, 261.
Feeding behavior in Pisaster, 127.
Fertilized sea urchin eggs, uptake and incorporation of amino acids by, 204.
Fertilizing capacity of aging Arbacia sperm, 251.
Fine structure of living squid sperm head, 404 (abstract).
Fingerman, M., E. F. Couch and E. W. Stool. Analysis of the melanin-dispersing and red pigment-dispersing hormones of the prawn and the fiddler crab, 390 (abstract).
Fingerman, M. See E. F. Couch, 388 (abstract).
Fish, effect of hypophysectomy on sodium metabolism of gill and kidney of, 155.
fresh-water-adapted, salt fluxes in, 362.
Fishman, L., and M. Levy. Collagen from the cuticles of marine worms, 390 (abstract).
Fishman, L. See M. Levy, 396 (abstract).
Flagellate, temperature adaptation in, 83.
Fleming, W. R. See J. G. Stanley, 155.
Flickinger, R. A. See D. M. Kohl, 323.
Flight ability in aging Musca, 479.
Fly, aging, duration and frequency of wing beat in, 479.
Food conversion of Penaeus at different temperatures, 186.
Forbes, W. F. See S. Lerman, 396 (abstract).
Forman, D. S. Reversible changes in the birefringence of the squid giant axon with temperature, 390 (abstract).
Freezing and thawing, mechanical forces as cause of cellular damage in, 197.
Frequency of wing beat in aging Musca, 479.
Fresh-water-adapted Fundulus, salt fluxes in, 362.
Frog gastrulae, role of NaCl in sequential induction in, 415.
Fruitfly, effects of temperature on, 331, 346.
Functions of crab urinary bladder, 272.
Fundulus, effect of hypophysectomy on salt metabolism of gill and kidney of, 155.
fresh-water-adapted, salt fluxes in, 362.

G

Gametes of starfish, mechanism of spawning of, 104.
Gastropod, density and dispersal in, 292.
Gastrulae of Rana, role of NaCl in sequential induction in, 415.
Geens, M., M. James and G. G. Holz, Jr. Destruction of the male gonophores of Tubularia by a hymenostome ciliate of the genus Paranophrys, 391 (abstract).
Gelfant, S. See T. Pederson, 401 (abstract).
Genetics of Artemia, 230.
Gibbins, J. R. See L. G. Tilney, 378 (abstract).
Gill metabolism of sodium in Fundulus, effect of hypophysectomy on, 155.
Glenodinium, endogenous diurnal rhythm of bioluminescence in, 115.
Glutamic acid, influence of amino acids on uptake and incorporation of in sea urchin eggs, 204.
Glycerol, effects of on sperm motility, 166.
Glycine, uptake of by Ophiactis, 172.
Gonad indices of Pisaster, 127.
Gonads of starfish, sensitivity of to nerve extract, 104.
Gonyaulax, endogenous diurnal rhythm of bioluminescence in, 115.
Grant, D. C. See W. R. Hunter, 292.
Griffith, G. W. See Z. P. Zein-Eldin, 186.
Grosch, D. S. The reproductive capacity of Artemia subjected to successive contaminations with radiophosphorus, 261.
Gross, W. J., and R. L. Capen. Some functions of the urinary bladder in crabs, 272.
Grossman, A., and W. Troll. The incorporation of C-14 lysine and C-14 phenylalanine into embryonic cell-free Arbacia preparations, 391 (abstract).

Growth of clam and oyster embryos and larvae, effect of pH on, 427.
and development of Pectinaria oocytes, 516.
of Euglena at different temperatures, 83.
of sea weeds in vitro, 487.

H

HANSON, J. See S. T. BOWEN, 230.
HARRINGTON, G. W. See J. E. DUNHAM, 389 (abstract).
HASTINGS, J. W. See G. T. REYNOLDS, 403 (abstract).
Hatching rate in Fundulus, as affected by temperature, 380 (abstract).
HAYS, R. L., AND A. I. LANSING. Isolation of surface membranes of Strongylocentrotus eggs, 392 (abstract).
HAYWARD, J. S., AND E. G. BALL. Quantitative aspects of brown adipose tissue thermogenesis during arousal from hibernation, 94.
Heart tissue of bat, metabolism of during arousal from hibernation, 94.
Heat, effect of on growth of postlarval Penaeus, 186.
genesis of brown adipose tissue of bats during arousal from hibernation, 94.
sensitivity of Drosophila pupae, 331, 346.
HEGYELI, A. Chemical studies of directin, 381 (abstract).
See R. JOHNSSON-HEGYELI, 382 (abstract).
HEIDGER, P. M. See J. A. MILLER, JR., 398 (abstract).
Hemocyanin, Limulus, subunit structure of, 384 (abstract).
Hepatic tissue of Pisaster, cyclic changes in, 127.
Hibernation of bats, brown adipose tissue thermogenesis during arousal from, 94.
HILLE, B., AND R. MILKMAN. A quantitative description of some temperature effects on Drosophila, 346.
HILLE, B. See R. MILKMAN, 331.
